

1. Project Title: Flight Database

Application Data: Flight with the following member variables:

flight_id – primary key (string, unique)

flight_number

airline_name

origin

destination

departure_time

arrival_time

status

aircraft_type

seat_capacity

2. Project Title: Hospital Patient Records Database

Application Data: Patient with the following member variables:

patient_id – primary key (string, unique)

first_name

last_name

date_of_birth

gender

blood_type

phone

diagnosis

medications

attending_physician

admission_date

discharge_date

3. Project Title: Hospital Patient Records Database

Application Data: Patient with the following member variables:

patient_id – primary key (string, unique)

first_name

last_name

date_of_birth

gender

blood_type

phone

diagnosis

medications

attending_physician

admission_date

discharge_date

4. Project Title: AI Model Registry Database

Application Data: AIModel with the following member variables:

model_id – primary key (string, unique)

model_name

version

organization

architecture_type

parameter_count

context_window

release_date

is_open_source

license_type

huggingface_url

paper_url

5. Project Title: Country / World Facts Database

Application Data: Country with the following member variables:

country_id – primary key (string, unique)

country_name

iso_alpha2

capital_city

continent

population

area_km2

gdp_usd

currency_code

official_language

government_type

un_member
